Carrier will be responsible for obtaining necessary route approval prior to move. The Iowa Detour and Embargo map should be used to obtain information for self-routing. Permit is not valid for travel on Interstate Highways. It will be the responsibility of the carrier to route themselves around low clearances, construction projects, embargoed roads, and bridges. If carrier demonstrates inability to self-route permit will be denied. Permits can be issued only for transporting single articles that exceed statutory size unless the inclusion of additional articles does not cause the size or weight to further exceed the statutory limits.
